

GALAXY_ SATURN ARS

The SATURN ARS machine has a very simple construction, it requires very little maintenance and it is suitable for customers who want to work at high speed. It can be used with washing cycles consisting of brushing and drying, suitable for those who perform the prewash manually.

The basic composition includes two upper fans, adjustable for the drying in the travel direction, but on demand it can also be equipped with lateral drying.

Another important feature is the possibility to have as an optional, the lateral high pressure and the wheel washer. The system is activated manually, through the push-button panel.

VERTICAL BRUSHES

The oscillating system of vertical brushes, allows them to work in a uniform manner, over the entire lateral surface of the vehicle, since the support is guaranteed only by their weight. In this way you can have the highest speed in the movements of the roll over.

HORIZONTAL BRUSHES

The horizontal brush is controlled by an amperometric electronic system which ensures maximum reliability. Its pressure is constant over the entire surface of the vehicle, in a fluid way, also to high speed of work.

DRYING

The type of drying to two opposing fans, pneumatically moved both vertical and horizontal direction so as to convey the air in the direction of movement of the machine thanks to their power, (4 Kw each) guarantee an excellent final result. Moreover, thanks to the simple system of movement, is possible to work to high speed.

FEATURES

- Structure in hot-dip galvanized steel, painted with powder
- Bolts and fittings for water in stainless steel
- Electrical panel controlled by PLC
- Push-button panel with Touch Panel, on demand
- Portal moved by Inverter
- Horizontal Brush electrically moved and electronically controlled
- Vertical Brushes on trolleys pneumatically moved
- Drying with 2 fans of 4 kW each
- Lateral drying with 4 kW motors, on demand

OPTIONALS

- Automatic anti-freeze device
- Carlite brushes
- High pressure
- Wheel wash
- Rims product
- Lateral drying
- Catenary on columns
- Anti-splash protections
- Wheel guides
- Self Service Station
